SPECIAL CONDITIONS:

This position is a Testing Designated Position (TDP) within the definition of the CSKT Drug Testing policy. **The successful applicant, if not already employed by the Tribes must pass a pre-hire drug test. The successful applicant will be required to serve a mandatory six (6) month probationary period.**

The Clinic Nurse, under direction, performs professional ambulatory nursing duties for outpatient clinical areas; treat and educate patients, their families, and the public regarding various medical conditions. This position records medical histories and symptoms, performs diagnostic tests and analyze results, operate medical equipment, administer treatment and medications, make assessments and create care plans, perform care coordination and care management. Ambulatory clinic nurses participate actively in the team-based care model; provide lead direction to other nursing and paraprofessional personnel and perform other duties as assigned/required by the assigned ambulatory clinical setting. Other essential duties include:

- Organizes, supervises, makes adjustments, and accepts responsibility for the quality of care provided to patients and family members.
- Participates in the implementation of patient care standards, infection control standards, and quality improvement standards.
- Provides patient-centered care that is respectful of, and responsive to, individual patient preferences, needs, and values.
- Provides and promotes excellence in service delivery for internal and external relationships.
- Performs clinical nursing care following prescribed roles, policies, protocols, and procedures.
- Collaborates with patients and other healthcare providers to deliver coordinated, high quality care.
- Completes patient assessments and triage, records patient histories, symptoms, and observations.
- Pre-charting and scrubbing actions to prepare for patient visits to include updating patient information, missing information, etc.
- Clinical skills include but are not limited to rooming patients, vital signs, point of care testing, point of care quality control, lab quality control and quality assurance, etc.
- Manage clinic supply inventory, ordering, re-ordering, monitoring for out-dates, medication stock/supply, etc.
- Administers medications, immunizations, performs medication reconciliation. Titrates medications and manages refills per clinical guidelines.
- Provides clinical support, care coordination and direct care management including patient education, goal setting, and self-management teaching and coaching.
- Effectively utilizes population health methodologies to include patient registries, in-reach/outreach practices, care protocols, and team-based care to improve patient and population outcomes.

- Provides care coordination of patient-centered care, based on evidence-based guidelines; coordination of patient's health care needs and treatment recommendations to establish and maintain care plans jointly created with and managed by patient, family, and care team.
- Performs accurate assessment of patient conditions (face to face or through telephone triage, etc.)
- Critically evaluates and uses good judgment in unusual or emergent situations.
- Request position description for a detailed description of desirable qualifications.

MINIMUM QUALIFICATIONS (AS REFLECTED ON THE TRIBAL EMPLOYMENT APPLICATION):
